

## What is Vyb?

VyB™ is a platform that holds people accountable for the way they treat others. Simply put, VyB™ can be thought of as a credit score of your social vibe. Built through the blockchain, one's VyB™ score is incorruptible, completely transparent, and represents one's true social nature. Just as a credit score represents one's financial accountability, one's VyB™ score represents one's social accountability. Your VyB™ score bridges the gap between the digital world and the real world.

VyB™ technology leverages the Blockchain to achieve the highest possible level of systemic transparency and incorruptibility. By leveraging the Blockchain, VyB™ vetted interactions automatically generate a permanent record thus creating a distributed ledger of all changes to all VyB™ Scores globally and by default alleviating the possibility of inaccuracy or nefarious manipulation

### Vyb and Blockchain

By leveraging blockchain technology, VyB scores are able to become part of a permanent, incorruptible record featuring inherent transparency. This transparency will cause users to trust the accuracy of our platform.

**Incorruptible**

**Completely transparent**

**One's true social nature**
